

Dynamic Login Pages - Support for Multiple Languages

Background

- RADIUSdesk is used across the globe today.
- In many of these places where RADIUSdesk are used, English is not the native language spoken. In fact some places might not even understand English.
- We now allow you to specify the language that the Captive Portal will display.

How we do it

- When you edit a Dynamic Login Page, there is a **Language** option under the **Settings** tab.

- You can then select one of the available languages.
- If you want to add or remove from the existing list of languages:

```
sudo vi /usr/share/nginx/html/cake3/rd_cake/config/DynamicLogin.php
```

- At the bottom is a list of languages and whether they are active or not:

```
$config['DynamicLogin']['i18n'][0] = array('name' => 'English', 'id' => 'en_GB', 'active' => true);
$config['DynamicLogin']['i18n'][1] = array('name' => 'Italian', 'id' => 'it_IT', 'active' => true);
$config['DynamicLogin']['i18n'][2] = array('name' => 'Spanish', 'id' => 'es_ES', 'active' => true);
$config['DynamicLogin']['i18n'][3] = array('name' => 'Afrikaans', 'id' => 'af_ZA', 'active' => true);
```

- Then you also have to specify the phrases in a file that match the **id** under the **/usr/share/nginx/html/rd_login/codebase/rd_i18n/** directory.
- Use the **en_GB.js** as reference.
- The Italian file for instance will be named **it_IT.js**.
- What this does is when the login page is displayed an extra field in the query string will be added (i18n).
- This field will then have the value of the phrases file which must be used, e.g. i18n=it_IT to use the Italian phrases instead of the default English.
