

Install RADIUSdesk

RADIUSdesk is typically installed in one of two ways:

- **Download and import as a virtual machine.** (Have a working RADIUS server in **less than 10 minutes!**)
- **From source.** (Takes roughly 1-2 hours)

Download and import as a virtual machine

From Source Forge

<https://sourceforge.net/projects/radiusdesk/files/VM-Images/>

- [RADIUSDesk VM on Windows using Virtualbox](#)
- [RADIUSDesk VM on Xubuntu using Virtualbox](#)

From source (Ubuntu 20.04)

1. [Using Nginx](#)
2. [Install FreeRADIUS](#)
3. [CoovaChilli](#) (optional).
